st.progress

Streamlit Version Version 1.41.0

Display a progress bar.

Function signature[source]

st.progress(value, text=None)

Parameters

```
value (int or float) 0 <= value <= 100 for int 0.0 <= value <= 1.0 for float
```

A message to display above the progress bar. The text can optionally contain GitHub-flavored Markdown of the following types: Bold, Italics, Strikethroughs, Inline Code, Links, and Images. Images display like icons, with a max height equal to the font height.

text (str or

None)

Unsupported Markdown elements are unwrapped so only their children (text contents) render. Display unsupported elements as literal characters by backslash-escaping them. E.g., "1\. Not an ordered list".

See the body parameter of st.markdown for additional, supported Markdown directives.

Example

Here is an example of a progress bar increasing over time and disappearing when it reaches completion:

```
import streamlit as st
import time

progress_text = "Operation in progress. Please wait."

my_bar = st.progress(0, text=progress_text)

for percent_complete in range(100):
    time.sleep(0.01)
    my_bar.progress(percent_complete + 1, text=progress_text)

time.sleep(1)
my_bar.empty()

st.button("Rerun")
```
